

6. Make a split pin body.

On the next three pages are some body shapes. Choose which one you want to do. (One of them needs colouring). Copy it on to thin card and carefully cut out the pieces (you may need to get someone to help). Carefully make holes so that you can put split pins through so that the parts make up a body (again you may need help. I found a sharp pencil with a rubber at the back works well).

Can you make the body wave, walk sideways, do the splits, sit down, do ballet poses?

7. Make a junk model body

How this turns out depends on what junk you have around! It could be something really big or really small. Use boxes, cardboard tubes, plastic bottles, paper plates, pipe cleaners, string, glue, sellotape, wool, old tins, other containers the list is endless.

Just have fun with it!

Here are a few ideas
